Due to space limitations only information on undergraduate courses or higher are reflected.
Celebrating its 65th anniversary this year, Chungnam National University, as a stronghold national university serving as the backbone of the national territory that bolsters up the future of Korea in the 21st century, and representing the Daejeon, Sejong and Chungcheong regions, Chungnam National University fulfills its responsibility as a base for growth and development of talent for the future and advancement of both the region and the nation.

Chungnam National University is doing its utmost to grow into ‘a representative university in Korea making a leap forward in the world’ by making the most of development-inducing conditions in the region that is being reborn as a hub of national administration, scientific technology and national defense, on the back of Sejong Special Self-Governing City, Daedeok R&D Special Zone, International Science & Business Belt and the Headquarters of Three Armed Forces.

In particular, in the era of the 4th industrial revolution, Chungnam National University is endeavoring to enhance educational competitiveness by nurturing knowledge about the humanities as seen in universities in advanced countries, strengthening education on advanced scientific technology software, and diversifying interdisciplinary studies while pushing for changes into ‘a knowledge-based value-creating university’ based on facilitation of the R&D and commercialization and university innovation functions featuring the establishment of a startup ecosystem.

On the strength of the accumulated trust among members of the university, it will boldly depart from the boundary of the university to achieve mutual growth along with the region through proactive collaboration with related institutions. The best efforts will be put into helping Chungnam National University emerge as a prestigious university in which everyone can take pride.

Chungnam National University aims to create Korea’s representative university, making a new leap forward in the world by making the most of the university’s accumulated competence and new development-inducing conditions.

We will emerge proud as Chungnam National University by making the most of the competence of the university, as well as regional development-inducing conditions in the era of the 4th industrial revolution.

Our slogan for the next generation is

CNU, A Leading University of Korea Leaping onto the World Stage

Chungnam National University, President, Deog-seong Oh, Ph.D.
CNU has set forth the vision of becoming a “leading university in Korea that leaps onto the world stage” and is endeavoring to implement 3 objectives, 4 missions, 16 strategies, 85 key pledges and 200 projects in order to realize this vision. Through these efforts, we will strive to emerge as one of the top 10 universities of Korea, and become a competitive university, a strong university through mutual growth, and a proud university.
CNU, leading in building a global network

CNU maintains close relations with 328 prestigious universities and institutions worldwide. Our students, who proudly lead the era of globalization, are honing their capabilities and global competencies through a variety of programs, including student exchange, global talent nurturing, dual degrees, visiting students, the Global Scholarship Programs, SSIS and WILL.
CNU, maintaining global competitiveness

Achievement

CNU is soaring as a world university of the 21st century. Differentiated, globalized, and the excellent education of CNU is creating the brain power of Korea.

CNU produces creative talents demanded by society in the 21st century. This is possible thanks to the endless support as well as top facilitators.
CNU students have a chance to enjoy the university life to the fullest by engaging in club activities in diverse areas such as volunteering, sports, academics, exhibitions, arts, religion, and foreign languages. Their passion and intellect bloom on campus during the peak of their youth.
Main Facilities

CNU, offering outstanding educational infrastructure

CNU students have a chance to enjoy the university life to the fullest by engaging in club activities in diverse areas such as volunteering, sports, academics, exhibitions, arts, religion, and foreign languages. They get to unleash their passion and full intellectual potential on campus during the time of vivacity and blooming.

CNU pursues values that are beyond what our eyes can see. A new academic horizon is opened through a variety of curriculums.
College of Humanities

A college with long history and traditions that focuses on humanities research and fosters creative talents with global competency

The College of Humanities fosters talented individuals with global competency, language skills and creativity through research and education in many disciplines, including languages, literatures, history, philosophy and archaeology. Graduates play pivotal roles in the local communities and nation, as well as on the international stage as professors, teachers, journalists, public officials, entrepreneurs, artists, Arts & Sciences. The College of Humanities, composed of 12 departments, 2,000 students and 77 competent professors, is the cradle of the only University Liberal Arts Competence Enhancement Project (CORE) Team in the Daejeon-Sejong-Chungnam Area, and the Daejeon Humanities Forum supported by Daejeon Metropolitan City.

Educational Competitiveness of the College of Humanities

The College of Humanities has the necessary systems and competitiveness to help students develop excellent talent in the area of the humanities. It offers opportunities for students to acquire dual degrees from CNU and a foreign university, invites outstanding foreign professors to give lectures in their native languages, and continually modernizes the lecture halls and learning equipment and materials.

Vision of the College of Humanities

In this era of globalization, students from around the world are flocking to the College of Humanities at CNU to further their studies. The College of Humanities is achieving growth and development as a world-class college, and it will do its utmost to ensure that the graduating students play pivotal roles in their own communities and nations.

A cradle of intellectual thought that nurtures the necessary qualifications and insights in examining the overall phenomena in the human society

The College of Social Sciences conducts research and provides education regarding social phenomena. Students are equipped with the insight and skills to observe and examine social phenomena, and nurtured into intellectuals who can create a brighter and more beautiful human society.

College of Social Sciences

The College of Social Sciences has been reinforcing its competitiveness to nurture talented individuals who can contribute to national and local development and creation of a knowledge and information society. It was named the Top Class in the National Public Administration Examination in 2000, and its students have achieved stellar results in the civil servant examinations and company recruitment examinations as well as essay contests.

Vision of the College of Social Sciences

The 21st century is a time when the ability to understand society, the world and mankind has become more important than ever. The vision of the College of Social Sciences is to scientifically explore the fundamental principles and mechanisms behind human behavior and gain global recognition for its capabilities, thereby contributing to the future of the people of Korea as well as mankind. Domestic students are offered a chance to take part in a field experience and learning program abroad, and international students are attracted from China, Mongolia and Southeast Asia as part of the multi-faceted efforts to achieve globalization.

College of Natural Sciences

A cradle of talent that secures international competitiveness in basic sciences

Presently, many people in the world emphasize the importance of interdisciplinary research based on harmony among diverse sectors. This interdisciplinary research can evolve through strong basic theories on natural science and creative thinking. The Natural Science College is producing talents who can contribute to developing scientific technologies of the nation through education on basic science in preparation for the 4th industrial revolution. In addition, it shares the latest information on academic research and experiments and conducts diversified academic exchanges in connection with various research centers in Daedeok Research Complex in accordance with Chungnam University’s concentrated development policy on basic science sectors.

Educational Competitiveness of the College of Natural Sciences

The College of Natural Sciences is equipped with advanced systems that can support the development of competitive experts in basic science and research through advanced lecture and research facilities, acquisition of overseas joint degrees, English lectures aimed to produce globalized talents, teacher-student exchange programs conducted among universities, the invitation of foreign professors, and self-directed education.

Vision of the College of Natural Sciences

In this era of knowledge and information, scientific technology has become the yardstick for measuring national competitiveness. The Korean government is planning to increase the ratio of R&D expenditures to GDP by 5%, with the aim of becoming one of the world’s top science and technology powerhouses. In line with the national plan, the College of Natural Sciences of CNU will be building an organic cooperation system between basic and applied sciences with the research complex and strives to fulfill its role as a cradle of scientists who contribute to society by advancing the basic sciences.

College of Economics and Management

Nurturing professionals with global competency and sense of ethics as one of the Asia’s top 20 school of commerce

The College of Economics and Management, which strives toward the mission of “fostering professionals with global competency and an excellent sense of ethics” with 51 faculty members and around 2,000 students, is arguably one of the top commerce schools in Korea. With an aim to become one of Asia’s top 20 schools of commerce, it teaches and conducts research on the academic theories for national development and advancement of mankind and their application methods, and produces graduates who are creative, want to serve others, and have rich leadership skills.

Educational Competitiveness of the College of Economics and Management

The Faculty of Economics and Management is comprised of stellar professors who acquired their doctorate degrees at prestigious universities in Korea and abroad. The College of Economics and Management fosters experts with global competitiveness who can meet the demands of the era of information and globalization. Academic exchanges with foreign universities and research institutions as well as student exchange programs help foster the global competencies of the students. Students are provided with in-depth employment support, practical and systematic education and training for reinforcement of entrepreneurship skills, and various other related information. Industrial-academic cooperation programs encompassing intensive theoretic and empirical research in the industrial and economic areas also contribute to the development of the national economy.

Vision of the College of Economics and Management

With the vision of “Asia’s Top 10 Schools of Commerce,” CNU College of Economics and Management is nurturing talented individuals with global competency and sense of ethics befitting of this era of globalization.

A Leading University of Korea Leaping onto the World Stage

Educational Competitiveness of the College of Engineering

The College of Engineering enhanced its education and research levels through the Brain Korea 21 (BK21) Program, and produced the most project teams in the nation during the BK21 Plus Program, which was the second phase of the program. As such, CNU’s College of Engineering is dedicated to nurturing outstanding creative talents in the field of engineering. Also, it contributed to CNU becoming the university with the most project teams selected for the Creative Korea (CK) Program, which aims to specialize universities in particular fields. Since 2012, the College has been taking part in the LINC Program, creating an industrial-academic cooperation model for mutual growth with the local industries. In 2015, it was chosen as a software-centered college by the Ministry of Science, ICT and Future Planning, and it is expected that its educational competitiveness will be further reinforced through the nurturing of creative and global software experts.

Vision of the College of Engineering

With the vision of becoming the “Growth Engine for Nurturing Talents for National Innovation,” the College of Engineering is nurturing excellent professors and students (Excellence), leading innovation in engineering education (Navigation), globalizing its research and education practices (Globalization), innovating engineering education to foster creative talents (Innovation), building an industrial-academic-research cooperation system (Network), and practicing the pioneering spirit (Entrepreneurship). In order to nurture top talents who will innovate and develop next-generation convergence technologies and undertake pivotal roles in R&D, the College of Engineering has been continually innovating its educational programs after the accreditation by participating in large-scale national support programs and promoting industrial-academic cooperation as its core strategy.

College of Engineering

An engineering education institution aiming to nurture scientists and engineers who can lead the development of future growth engines

The College of Engineering is nurturing scientific minds who will lead the information and knowledge society of today, amidst the rapid changes and advancements. Faculty members, who have been recognized domestically and internationally for their teaching and researching capacities, educate students and undertake research. The College also contributes to the industrial development of Korea by executing various collaborative projects with the industries and government agencies.
A Leading University of Korea Leaping onto the World Stage

Educational Competitiveness of the College of Agriculture and Life Sciences

The College of Agriculture and Life Sciences has established itself as a national center of education and research by producing some 17,000 graduates in the fields of agriculture, life sciences and biotechnology. With 74 professors, 1,630 undergraduate students and 300 graduate students, the College is playing a leading role in the development of agriculture and life sciences in Korea. Of particular note, the research achievements made by its faculty are considered to be of the highest quality in Korea.

Vision of the College of Agriculture and Life Sciences

The College of Agriculture and Life Sciences is striving to incorporate traditional and frontier technologies (BT, IT, NT, ET, etc.) in the agricultural food and bio industries in order to develop them into systematic and scientific industries with addition of high value in all of the stages from production to consumption. Also, it will promote “urban agriculture” to fulfill its role as a regional university that improves the health and environment of Chungcheong residents and continually cooperates with the local government agencies to create a sustainable green ecological environment of LOHAS (Lifestyle of Health and Sustainability) for the local residents.

College of Agriculture and Life Sciences

Leading in research and education for agricultural development with outstanding human resources

The College of Agriculture and Life Sciences specializes in the education and research of advanced scientific technology of using natural bio and environment resources to create high value added goods and services, thereby contributing to the advances of agricultural technology and playing an important role in the advanced agricultural and bio industry. With the top-notch faculty and outstanding research results, it has been recognized as one of the foremost education and research institutes in the area of agriculture and life sciences in Korea.

College of Pharmacy

A key pharmacy education and research institution in the central area that fosters pharmacists with superb competitiveness

The College of Pharmacy is fostering professionals who not only have expertise in the development, production, management, supply and clinical application of drugs used in disease prevention and treatment, but also have outstanding ethical principles and spirit of service. The 6-year pharmacy program is geared toward “consumer-centered education,” rather than “supplier-centered education.” Students are also equipped with practical skills rather than merely theoretical knowledge, which ensures 90% employment. As such, the Department of Manufacturing Pharmacy is run to meet the demands of our local communities and nation.

Educational Competitiveness of the College of Pharmacy

Based on education provided by excellent faculty and research achievements, The College of Pharmacy conducts large-scale national research projects including BK21 PLUS, LINC Development Project and Chungcheong Area Convergence Bio-Medicine Project, while providing the support required to provide exemplary education. In the Joongang Daily University Evaluation in 2013, it ranked 1st in the number of SCI papers per professor among subjects of evaluation and was cited as an excellent college in the pharmaceutical sector. It was selected as the best department of Chungnam University by the Ministry of Education in 2014 and became the only domestic stronghold national university that entered the top 100 list in the pharmaceutical sector of QS World University Rankings for two years in a row in 2015 and 2016. Based on excellent educational competitiveness, the Pharmaceutical College holds a 1:10 teacher-student ratio while focusing on nurturing specialized pharmacists and researchers. In addition, 100% of lectures are offered by full-time faculty members, 100% of students participate in practical training, and 70% of students receive scholarships.

Vision of the College of Pharmacy

Pharmacy is an academic discipline of research and development of academic theories and technologies for the use and development of medicinal drugs and treatment and prevention of diseases. The educational objective of the College of Pharmacy is to nurture outstanding professionals who can lead the area of pharmacy in the future. In addition to the conventional educational programs, national research programs, such as BK21 Plus (fostering of creative talents to develop innovative new drugs) and Central Research Institute Support Program (research to develop therapeutic agents for cardiovascular diseases), are being undertaken to produce creative talents with global competency who can create new national growth engines.
College of Medicine

Practicing advanced medicine to contribute to the promotion of public health of mankind

The College of Medicine nurtures ideal medical professionals, who can help eradicate diseases based on humanism and holistic understanding of human diseases. Through the basic and clinical medicine programs, the students are equipped with the skills that can be applied to primary medical care. To this end, the traditional medical education program in a classroom setting and hands-on clinical experience at a top-notch hospital help students become competent professionals who can provide advanced medical care.

Educational Competitiveness of College of Medicine

The College of Medicine aims to nurture doctors who are talented, warm, and reliable, and who serve their patients and communities. Students acquire basic knowledge and techniques for primary medical care and hone their skills in disease prevention, diagnoses and treatment. They are also encouraged to engage in personal development by actively responding to the cutting-edge advances in medicine and the trends in today’s global and information society, and develop their problem-solving skills using assessment and analysis skills. Students are nurtured into medical professionals with respect for life and ethics so that they can better contribute to society. Also, students are equipped with leadership skills and qualifications so that they can actively help improve public health in their local communities, and contribute to the development of the bioscience industry through medicine.

Vision of the College of Medicine

A leading educational system has been established in order to nurture medical professionals who fulfill their social responsibilities through competency-based medical education. The aim of the College of Medicine is to grow into an institution that plays a critical role in medical research to bring forth simple solutions for human diseases.
College of Human Ecology

Cradle of human ecology that helps create a rich culture for the future

The College of Human Ecology equips students with creativity to enhance the quality of life for mankind and to apply their creativity to the existing values, cultures, information and scientific technologies, as well as leadership skills to communicate with the masses. Through research on consumer lifestyle information, food and nutrition, and clothes and textiles as well as local community services, students get a chance to create new value and enrich people’s lives by incorporating human ecology and advanced technologies.

Educational Competitiveness of the College of Human Ecology

The Department of Clothing and Textiles provides sensible, technical and integrative expert development programs by dividing sectors related to clothing materials, product planning, design and global distribution into specialized and field-customized courses. The Department of Food and Nutrition operates certified nutritionist education programs and participates in LINC. By installing a dietary educational institution and Yuseong-gu Children’s Meal Service Management Support Center the Graduate School operates clinical nutritionist education courses certified by the Ministry of Health and Welfare, and develops experts equipped with theoretical knowledge and practical experience. The Department of Consumer Science nurtures creative experts who strengthen consumer sovereignty and lead sustainable consumption culture, and provides essential curriculum required to prepare for the AFPK (Associate Financial Planner Korea) Test by being designated as FPSB (Financial Planning Standards Board) in Korea in September 2012.

Vision of the College of Human Ecology

The College of Human Ecology of Chungnam University is a cradle of human ecology that leads living culture in the future, provides creative convergence education, problem-solving-oriented learning and field-oriented education in order to nurture talents desired by companies, as well as experts who can resolve regional social problems. The educational objectives of the College of Human Ecology are concentrated on nurturing talents equipped with 3P (positive attitude, professionalism, and potentiality) by fostering 3C (creativity, customization, and collaboration). It is focused on developing talents with creativity that makes it possible to understand the society with a multi-disciplinary way of thinking, advancing customization aimed to respond to needs and desires of the era and the society, and providing education aimed to facilitate collaboration for problem-solving among civic groups, society and local governments. This is accomplished by emphasizing positive attitudes based on good character and a sense of community, professionalism based on academic knowledge and practical competence and potentiality based on the proactive development of potential power required to lead our society in the future.
College of Fine Arts & Music

Fostering talents with creativity and a global view to lead the global arts culture

The College of Fine Arts and Music aims to foster creative artists with artistic sensitivity in diverse areas of specialization including music, fine art, design and crafts. It is a center of art education with an intensive learning system for providing theoretical and practical education. The College of Fine Arts and Music conducts creative and research activities as well as international cooperation activities to promote the development of the arts and culture in Korea and to foster global talents. The current students and alumni are active on various stages, holding presentation and exhibitions at home and abroad or working for companies.

Dept. of Music (Vocal, Composition, Piano)
Dept. of Orchestral Instruments (Wind Music, String Music)
Dept. of Fine Arts (Korean Painting, Western Painting)
Dept. of Sculpture
Dept. of Design and Material studies (Ceramics & Textile Design / Visual & Product Design)

http://art.cnu.ac.kr

Educational Competitiveness of the College of Fine Arts & Music

In the College of Fine Arts & Music, student participation has been on the rise in regards to contests, exhibitions, recitals and registration with the orchestra and choir. Industrial-academic-research programs are conducted to help equip students with an international and global sense, experts and scholars from around the world are invited to give special lectures, and international exhibitions and workshops are organized in order to nurture future-oriented artistic talents who can lead the local arts community.

Vision of the College of Fine Arts & Music

Based on the vision of “Fostering Talents to Lead the Arts Culture,” the College of Fine Arts & Music has set forth three strategies with the educational objectives of internationalization (globalization), practicality (convergence) and competency building (professors and students). First, the College of Fine Arts & Music is creating a global education environment by pursuing exchanges with the overseas sister universities, increasing opportunities for overseas education and training, launching arts courses in English and expanding the scope of activities of its affiliated institution, the Arts Culture Research Institute. Second, it is attempting to resolve the unemployment crisis affecting its students through an internship program and by creating more job opportunities in new career paths, such as music therapy, art therapy and art management. Third, the College of Fine Arts & Music helps its professors and students build their capacities and develops future-oriented curriculum in order to lead the era of the arts and culture in the 21st century.
College of Veterinary Medicine

Production of specialized veterinarians who contribute to enhancing the health and welfare of human beings and animals

The College of Veterinary Medicine is doing its utmost to produce sincere future-oriented veterinarians who can contribute to enhancing the health and welfare of human beings and animals through diversified creative specialized educational programs. Focused on nurturing specialists, the college is making efforts to produce competent veterinarians who can expertly treat animals, prevent diseases, and conduct various tests and experiments aimed at safely providing various medicines, remove diverse epidemics and threats posed to the life and health of human beings and animals, and carry out advanced bio-engineering research.

Educational Competitiveness of the College of Veterinary Medicine

The College of Veterinary Medicine fosters veterinarians who work to treat and prevent animal diseases, secure food and drug safety for mankind, and prevent and control communicable diseases between man and animal. In addition, through biotechnology education and research, talented individuals are nurtured so that they may contribute to the creation of next-generation industrial growth engines and the improvement of the welfare of mankind. The nation’s foremost professors and staff are dedicated to this purpose.

Vision of the College of Veterinary Medicine

The College of Veterinary Medicine has achieved noteworthy research outcomes in clinical trials on small and industrial animals as well as public health issues related to food safety, diverse animal diseases and communicable zoonotic diseases. Also, as the top national university in the central region, outstanding graduates contribute to the areas of food, sanitation, quarantine, and clinical trials on small and large animals. The College of Veterinary Medicine will continue to produce excellent professionals, along with the trend in the growing social importance of veterinary medicine.

http://vetmed.cnu.ac.kr
College of Education

Fostering outstanding and creative education specialists who can contribute to national development and the advancement of mankind

The College of Education conducts research and educates students on the theories and practical applications in relation to education. Its objective is to foster outstanding and creative teachers and education specialists who can contribute to national development and advancement of mankind. It runs curricula that are suitable for the educational settings and academic theories of 10 departments, thereby nurturing students into competent secondary school teachers and training current teachers.

Educational Competitiveness of the College of Education

Various teacher education and training programs are being conducted, including general education and subject education for professors and teachers, teaching certificate examination assistance including essay writing guidance, the Teaching Capability Improvement Program for prospective teachers (teaching media protection and micro-teaching workshops), Career Development Program (improving aptitude as a teacher), Counseling Education Program for middle and high school students, and a mentoring program for teachers and students to create an education think-tank. Students of the College of Education have the highest acceptance rate for the Teaching Certificate Examination in the industrial education field.

Vision of the College of Education

Under the “Great Vision for Education Leaders”, the College of Education is creating a community of intellectuals and educators who will lead the global era with Vitality (vivacious and inspirational education), Intelligence (rational thinking and intelligence), Scholarship (academic expertise and knowledge creation), Innovation (innovative mind and practices), Outstandingness (outstanding leadership as educators) and Network (global education network).
College of Nursing

Fostering nurses who can contribute to enhancing the quality of life and well-being of mankind

The College of Nursing, a central nursing school in the Daejeon and Chungcheong region, is producing nursing educators, researchers, leaders and working-level experts with the purpose of improving the quality of life for people and their well-being, based on the principles of humanism and holism. Furthermore, global nursing professionals are fostered and they are encouraged to explore and apply global knowledge as a means to contribute to the progress of the nursing discipline and enhancement of public health.

Educational Competitiveness of the College of Nursing

In line with rapid changes in the medical environment, the Nursing College enables students to experience 20 core technical items through clinical trials, and operates comprehensive selective training through a final integrated exercise. It also offers a teacher training course and operates Nursing Department BLS (Basic Life Support) for generations of global nursing professionals so that students can acquire International CPR Certification before graduation every year. In addition, it invites experts in a wide range of nursing areas including health centers, schools, Health Insurance Review & Assessment Service and CRC/CRA, and provides special lectures on employment every year while doing its utmost to help students manage their career by supporting the acquisition of International Tai Chi Certification and operating Open LAB.

Vision of the College of Nursing

Nurses with global competency will be in higher demand in the 21st century due to a paradigm shift. Accordingly, our students not only acquire knowledge in their area of specialization, but also devote their time and effort to mastering foreign languages. The CNU College of Nursing was accredited for the undergraduate nursing program by the Korea Accreditation Board Of Nursing, and the construction of the Practical Education Center for the College of Nursing was completed in 2015. The College of Nursing will continue to strive to provide quality education and nurture competent professionals in the area of nursing.
College of Bioscience and Biotechnology

Development of Korea’s best life science and bio-engineering specialists who will lead the advanced industrial society in the 21st century

The Life System Science College drastically improved education and research environments through NURI, medicine-pharmacy-bio talent development project and BK21, and elevated the level of scholarship and welfare to the top level within Korea. It is nurturing Korea’s best life science and bio-engineering experts who will take responsibility for the future of Korea.

Vision of the College of Bioscience and Biotechnology

Life science is a leading science in the 21st century that plays an essential role in resolving four core problems that pose serious challenges to mankind: disease, food, resources, energy and the environment. In particular, due to Korea’s limited territory and natural resources, life science is an important academic field that Korea must advance in order to join the ranks of advanced countries. The Life System Science College will do its utmost to produce world-class talent in the life science and bio-engineering sectors.

Educational Competitiveness of the College of Bioscience and Biotechnology

The Life System Science College of Chungnam University is the only life science-related college among the national universities of Korea. It is a byproduct of the firm determination of Chungnam University to nurture a college that takes initiative in the life science sector. The educational competitiveness of the Life System Science College is directly substantiated through its participation in numerous governmental projects (NURI in 2004, BK21 in 2007, Medicine-Pharmacy-Bio Talents Development Project in 2010, LINC Project in 2012, BK21 Plus in 2013 and CK-I in 2014). Industry-university collaboration education conducted in cooperation with local businesses and research centers is another advantage boasted by the Life System Science College.
Faculty of Liberal Arts

The mecca of liberal arts aimed at nurturing the next-generation’s global leaders

The Faculty of Liberal Arts allow students to study diverse academic disciplines centering on the liberal arts such as the humanities, social sciences, and scientific technology, in order to gain better adaptability, multi-faceted insight, judgment skills, problem-solving skills and other capabilities that will help them make changes in our future society, which will be ever more complex and dynamic. Students are taught to become more understanding of differences, have an open mind, and be able to synthesize information so that they emerge as global leaders.

Educational Competitiveness of the Faculty of Liberal Arts

The Faculty of Liberal Arts allow students to study diverse academic disciplines centering on the liberal arts such as the humanities, social sciences, and scientific technology, in order to gain better adaptability, multi-faceted insight, judgment skills, problem-solving skills and other capabilities that will help them make changes in our future society, which will be ever more complex and dynamic. Students are taught to become more understanding of differences, have an open mind, and be able to synthesize information so that they emerge as global leaders.

Vision of the Faculty of Liberal Arts

The Faculty of Liberal Arts of CNU promote the traditions of liberal arts based on the philosophy of imparting broader knowledge and teaching values and a sense of ethics. Students gain communication skills for making compelling arguments, judgment skills, and an understanding of diversity for better empathy. By combining research fields that break down traditional academic boundaries professors also provide students with opportunities to develop interdisciplinary approaches to solve real world issues through cooperation. Through this, students are able to study diverse academic disciplines without restrictions.
School of Integrated National Security

Nurturing elite commissioned officers who can safeguard the territorial land, sea and airspace of their homeland

The School of Integrated National Security is the first national college established to lead research and education in national defense, military, diplomacy, national security and re-unification. An agreement has been reached with the Republic of Korea Army and Navy, which jointly run master’s and doctoral programs, with the aim of producing outstanding talents for the military and leaders in the area of national defense.

Educational Competitiveness of the School of Integrated National Security

It is the first national college, for which an agreement has been concluded with the Republic of Korea Army and Navy. The faculty is comprised of outstanding professors who have acquired doctoral degrees in military studies from domestic and foreign universities and former generals and admirals with vast experience in the field. The infrastructures and systems are optimized to nurture outstanding talents through liberal university life, education in diverse areas of study, and field training in the military.

Vision of the School of Integrated National Security

Students are equipped with the character, physical fitness and strength, and commanding capabilities necessary to become elite commissioned officers and leaders of society. Double major programs are also offered so that graduating students can seek jobs outside the military instead. This is an outstanding program recommended to young adults, who aspire to become creative leaders and serve their nation and society.
The Graduate School of Chungnam National University keeps up with the changes in academia in this era of rapid changes, and fosters talented individuals with expertise, creativity and leadership skills through advanced research and education.

The purpose of the Professional Graduate School is to produce the best possible professionals worldwide through in-depth study in each field.

Law School
The Law School was established upon the educational ideology of “community service, increasing capacity for legal service and strategic development of the nation.” The Law School aims to nurture internationally competitive legal professionals who demonstrate expertise in intellectual property rights law.

School of Medicine
The objective of the School of Medicine is to generate medical professionals with the latest knowledge in the field of modern medicine and life sciences, and to obtain human-centered medical skills. Moreover, the school aims to foster medical experts and professionals who will contribute to the advancement of medicine and humanity.

Graduate School of Analytical Science and Technology
The Graduate School of Analytical Science and Technology (GRAST) aims to cultivate the most capable professionals with solid basic knowledge by training students with the world’s highest R&D equipments. The GRAST has fused diverse fields of science and technology such as biology, physics, chemistry, materials, chemical engineering, electrical engineering and etc.

Graduate School of Energy Science and Technology
It was established to nurture creative experts equipped with world-class education and research competitiveness in the energy industry sector based on education and research competence, advanced R&D facilities, and equipment of energy science technology research centers and university education institutions, as well as produce a technology powerhouse in the energy sector. The objective is to produce professionals for the energy science and technology area, which include but is not limited to the development of key technologies related to renewable energy, greenhouse gas reduction and treatment, energy efficiency improvement, and nuclear re-treatment after use.

Graduate School of New Drug Discovery and Development
Graduate School of New Drug Discovery and Development was established to become a professional institution to be considered as a world-class level in a new drug development by improving the level of Korea’s pharmaceutical industry.

School of Business Administration
The Graduate School of Business Administration aims to provide students with academic theories in business administration and modern management techniques, and accordingly, to foster chief executive officers who will take vital roles in modern industrial society.

School of Education
The Graduate School of Education was established to cultivate educational specialists who can systematically study methods applied with ideas of education on Higher Education Act so as to contribute to the development of the nation and society.

Graduate School of Intellectual Property Law
The Graduate School of Intellectual Property Law was established to cultivate and re-train professional practitioners. Special emphasis is given to the subject of intellectual property rights law in the academic curriculum of the school. Graduates are expected to enhance fundamental of the knowledge-based society.

Graduate School of Peace and Security Studies
With the broad mandate of contributing to national development, the Graduate School of Peace and Security Studies is devoted to foster scholars with specialized knowledge in national security systems and a peaceful & sustainable international order.

Graduate School of National Public Policy
The Graduate School of National Public Policy was established to cultivate professionals who can apply theories and practices of national public policy so as to contribute to the development of the nation.

The purpose of the Specialized Graduate School is to produce professionals who can lead modern society through the most optimal education infrastructure.

Graduate School of Business Administration
The Graduate School of Business Administration aims to provide students with academic theories in business administration and modern management techniques, and accordingly, to foster chief executive officers who will take vital roles in modern industrial society.

Graduate School of Education
The Graduate School of Education was established to cultivate educational specialists who can systematically study methods applied with ideas of education on Higher Education Act so as to contribute to the development of the nation and society.

Graduate School of Public Administration
The Graduate School of Public Administration is established upon the founding principles of fostering capable and competent public and civil personnel with innovative leadership and creative ability to translate theories into practice. In pursuit of these principles, the school offers interdisciplinary scholarships, which connect and integrate diverse academic schools of thoughts in the social sciences.

Graduate School of Public Health
The Graduate School of Public Health contributes to the development of the society and nation through education and research into theory and practice in the field of public health. The program leads to a Masters degree in Public Health.

Graduate School of Industry
The Graduate School of Industry was established to cultivate professionals who can apply theories and practices of industrial technology so as to contribute to the development of the region and the nation.

Graduate School of Intellectual Property Law
The Graduate School of Intellectual Property Law was established to cultivate and re-train professional practitioners. Special emphasis is given to the subject of intellectual property rights law in the academic curriculum of the school. Graduates are expected to enhance fundamental of the knowledge-based society.

Graduate School of Peace and Security Studies
With the broad mandate of contributing to national development, the Graduate School of Peace and Security Studies is devoted to foster scholars with specialized knowledge in national security systems and a peaceful & sustainable international order.

Graduate School of National Public Policy
The Graduate School of National Public Policy was established to cultivate professionals who can apply theories and practices of national public policy so as to contribute to the development of the nation.
Every CNU institute has noteworthy achievement flowing from the best quality educational and research environments connected with industry, the academy and research affiliation such as the International Scientific Business Belt and Daejeon Impolis, enhancing CNU's position and potential not only domestically but also worldwide.
University Profile

Undergraduate & Graduate School

Undergraduate: 23,971
Graduate School: 5,395

Undergraduate

- College of Humanities: 2,135
- College of Social Sciences: 1,458
- College of Natural Sciences: 2,125
- College of Economics & Management: 2,225
- College of Engineering: 4,840
- College of Agriculture & Life Sciences: 1,430
- College of Law: 12
- College of Pharmacy: 277
- College of Human Ecology: 535
- College of Fine Arts & Music: 596
- College of Veterinary Medicine: 383
- College of Education: 912
- College of Nursing: 402
- College of Bioscience & Biotechnology: 367
- Faculty of Liberal Arts: 234
- School of Integrated National Security: 233

Graduate School

- Graduate School: 3,003
- Professional Graduate School: 810
- Specialized Graduate School: 1,582

Faculty

- Undergraduate: 924
- Graduate School: 85

Current Status of Degree Conferred

- 2017: 178,655
- 2016: 139,552

Scholarship (Undergraduate)

- Total Allotted: KRW 47,501,050
- Tuition (Undergraduate): KRW 70,253,543

Current Status of CNU Graduates’ Employment (Undergraduate)

- 2013: 58.2%
- 2014: 58.3%
- 2015: 58.2%

Research Funds (Based on announcement year)

- 2013: KRW 96,090,550
- 2014: KRW 96,924,954
- 2015: KRW 102,070,568

Number of Books and Seats in Library

- 2015: 1,703,371
- 2016: 1,703,371

Staff

- Mar. 01, 2017: 474
- Civil Servants: 244
- University Accounting: 230
- Bachelors: 32,570
- Masters: 4,468
- Doctoral Degree: 1

Scholarship Allotted

- Internal scholarships for excellence: KRW 5,381,320
- External scholarships: KRW 33,537,953
- Internal scholarships for students from low-income families: KRW 4,721,295
- Other internal scholarships: KRW 3,860,482
- Internal scholarships for students from low-income families: KRW 4,721,295
